

Allied Health

Tech 1, 2 and 3

Hi guys! I hope that you and your family all have been well over the last month or so and had an enjoyable Easter even though it may have been different than you all are used to. My family and myself have been fine and I am spending my time getting ready for next school year. I have many new and exciting things in store for all of us and am hoping we can move forward without any glitches (or at least not very many 😊). I would like to do more hands on activities, have guest speakers come in and go on more field trips or at least that is my plan but as always, much of this depends on you guys and how much review we need to do in the fall. So, we shall see. Below are a few YouTube videos that I want you all to review and practice in order to help maintain the competency skills/knowledge you have already acquired. This will help you to be competent for next school year and/or in preparation for the NOCTI exam. I will be posting new videos and sites every two weeks, the next one will be May 4th and the last May 18th. Please make sure you review and watch these so we can continue to keep moving forward 😊. I will post this on Skyward too as the weekly assignments. I am going to have a Zoom classroom meeting next week so we can all talk about our feelings and everything that's going on around us. If you have any questions or concerns or need any help with studying for the NOCTI's I can be reached at CBray2@mckasd.net I know not everyone has Internet access or communication so pass along this info and my email address to your fellow students. I would also appreciate it if you could send me your phone numbers because I am having a hard time contacting everyone. I only have parent's numbers which many are out of service or not answering. Thank you all and I'm looking forward to talking to everyone! I miss you guys terribly! **Stay safe and please touch base with me somehow!**

***YouTube April 20th thru May 4th:

Handwashing: What you need to know about handwashing (2:01) Handwashing for healthcare workers? Handwashing soap and water technique nursing skills (6:17)

Chain of Infection: Chain of Infection 10/05/17 (3:44)

Corona Virus: Flu Attack! How a virus invaded your body/Krulwich Wonders/NPR
(3:39) The corona virus explained & what you should do (8:34)

Social Distancing: Social Distancing- UC Irvine (1:49)

Assignment: WEEK 1 (April 20th)

1. After watching the videos think about and answer these questions (more than just one or two sentences):
 - Why is handwashing important?
 - How does handwashing interrupt the Chain of Infection?
 - How does the Corona Virus attack the body?
 - Why does social distancing help prevent the spread of the virus?
2. Teach your parents, siblings, family members and friends about how the Corona Virus is spread and why handwashing and social distancing are important in preventing further spread of the virus.

Assignment: WEEK 2 (April 27th)

3. Watch the news and look at the situations the healthcare professionals are facing when caring for patients with Corona Virus.
 - Describe in detail or list on a piece of paper the kinds of values and ethic nurses and doctors that are caring for the COVID-19 patients possess (Give examples).

Take a photo of the weekly assignments and email them to my email address:
